SUMMARY OF INFORMATION

The target area is near the ocean. The target itself is a building located on a bluff overlooking the ocean. The wave action on the beach is minimal. There is a stone stairway leading from the beach to a walkway which leads to a guarded entrance into the compound surrounding the house.

The house is white with mediana tiles on the roof. Part of the walls of the house are exposed concrete block.

Inside the building there are people running around frantic about developing situations. There are TV monitors tuned to several stations. There is a large amount of radio gear present. The major activity is that of gathering message traffic and passing it on with directions and decisions.

There are two young men that are the action makers here there is an older man (who appears to be in shock) that is just listening and periodically giving approval and minor guidance.

There were armed guards in the vicinity of this structure and there is a field which has been used for small aircraft in the vicinity (approximately 300-500 meters away).
